

Dear Sir or Madame, I am writing to place my objection to the NAB's petition 04-160. I, as well as many others, pay for XM Satellite radio and as such should be able to listen to what XM can legally broadcast. If there are no legal precedents regarding XM's broadcast of Instant traffic and Weather then the NAB has no ground to stand on. XM provides a great service and at a low price, but XM does not force their broadcasts on listeners. It is a pay service and voluntary for the public to participate. To me this is just another way for big money to corrupt our government. Please prove me and others wrong by rejecting this petition and the NAB's effort to stifle free speech. Sincerely,
Donald Thomas
